

Developmental Milestones: Physical/Fine Motor

Child begins to scoop or rake with their hand to pick up objects, food, etc.

These observations involve the following developmental skills:

- Fine motor control and dexterity
- Self-confidence
- Spatial awareness
- Eye-hand coordination

Developmental Milestones: Physical/Fine Motor

Child picks up an object

These observations involve the following developmental skills:

- Fine motor coordination
- Body control
- Self-confidence
- Spatial awareness
- Eye-hand coordination

Developmental Milestones: Physical/Fine Motor

Child transfers object from one hand to another

These observations involve the following developmental skills:

- Fine motor coordination and dexterity
- Body strength and control
- Self-confidence
- Spatial awareness
- Problem solving
- Eye-hand coordination

Developmental Milestones: Physical/Fine Motor

Child begins feeding self using fingers

These observations involve the following developmental skills:

- Fine motor control and dexterity
- Self-confidence
- Spatial awareness
- Eye-hand coordination
- Independence
- Self-help skills

Developmental Milestones: Physical/Fine Motor

Child is beginning to grasp small objects with thumb and forefinger

These observations involve the following developmental skills:

- Fine motor control
- Self-confidence
- Spatial awareness
- Self-awareness
- Eye-hand coordination
- Thinking, reasoning, and problem-solving

Developmental Milestones: Physical/Fine Motor

Child points to something they find interesting

These observations involve the following developmental skills:

- Fine motor coordination
- Body control
- Self-confidence
- Curiosity and wonder
- Self-awareness
- Communication

Developmental Milestones: Physical/Fine Motor

Child holds object in hand

These observations involve the following developmental skills:

- Fine motor control and dexterity
- Self-confidence
- Spatial awareness
- Eye-hand coordination
