

Developmental Milestones: Cognitive/Language & Communication

Child looks in the direction of a sound

These observations involve the following developmental skills:

- Sensory awareness
- Alertness
- Ability to respond to sound
- Auditory discrimination

Developmental Milestones: Cognitive/Language & Communication

Child coos with or without an adult

These observations involve the following developmental skills:

- Self-awareness
- Language & communication
- Emotional & social responsiveness
- Expression of emotions
- Self-confidence
- Vocal development

Developmental Milestones: Cognitive/Language & Communication

Child makes a variety of sounds to express needs and interests

These observations involve the following developmental skills:

- Self-awareness
- Interactions with others
- Recognition of sounds/tones
- Auditory discrimination
- Language and communication
- Self-confidence
- Vocal development

Developmental Milestones: Cognitive/Language & Communication

Child babbles responsively with an adult

These observations involve the following developmental skills:

- Self-awareness
- Interactions with others
- Recognition of sounds/tones
- Language and communication
- Self-confidence
- Vocal development

Developmental Milestones: Cognitive/Language & Communication

Child experiments with vocalizations

These observations involve the following developmental skills:

- Self-awareness
- Recognition of sounds/tones
- Vocal development
- Auditory discrimination
- Self-confidence

Developmental Milestones: Cognitive/Language & Communication

Child responds with gestures to adult body language and directions

These observations involve the following developmental skills:

- Auditory/visual processing
- Thinking, reasoning, and problem-solving
- Language & communication
- Following directions
- Self-confidence

Developmental Milestones: Cognitive/Language & Communication

Child uses intonations in sounds

These observations involve the following developmental skills:

- Self-awareness
- Interactions with others
- Auditory discrimination
- Recognition of voices/sounds/tones
- Vocalization

Developmental Milestones: Cognitive/Language & Communication

Child begins to develop receptive language vocabulary

These observations involve the following developmental skills:

- Self-awareness
- Interactions with others
- Auditory discrimination
- Recognition of voices/sounds/tones
- Comprehension of oral language
- Receptive language development

Developmental Milestones: Cognitive/Language & Communication

Child strings single consonant sounds

These observations involve the following developmental skills:

- Self-awareness
- Self-confidence
- Auditory discrimination
- Recognition of sounds/tones
- Memory/repetition
- Expressive language development
- Language and communication

Developmental Milestones: Cognitive/Language & Communication

Child learns appropriate gestures to familiar words/phrases

These observations involve the following developmental skills:

- Self-awareness
- Language & communication
- Emotional & social responsiveness
- Expression of emotions
- Self-help skills
- Self-confidence

Developmental Milestones: Cognitive/Language & Communication

Child strings a combination of vowel and consonant sounds

These observations involve the following developmental skills:

- Self-awareness
- Auditory discrimination
- Recognition of sounds/tones/words
- Memory/repetition
- Expressive language development
- Self-confidence

Developmental Milestones: Cognitive/Language & Communication

Child notices facial expressions and body language when adult is talking

These observations involve the following developmental skills:

- Self-confidence
- Interactions with others
- Increasing concentration
- Alertness
- Social responsiveness
